Application for Internship in Quality Management Development
Job ID: 98765QE

Dear Ms. Müller-Schmidt,

I have been following the continuous development of sophisticated systems and technologies within vehicle interiors, such as augmented reality head-up displays and driver state recognition, with great enthusiasm. I am eager to participate in shaping how vehicles will interact with occupants in the future, and thus, I am applying for an internship in the area of Quality Management Development.

Currently, I am in the 4th semester of my Bachelor's degree in Mechanical Engineering at the Karlsruhe Institute of Technology (KIT), where I have gained fundamental insights into the fields of quality and development. Among the activities you described, I am particularly drawn to the opportunity to assist in product qualifications and even conduct them myself. Through group projects and collaborations during my studies, I have also gained initial experience working with international teams. In one of these projects, I programmed with Visual Basic.

I have demonstrated dedication, creativity, and organizational skills through my involvement in planning the annual summer festival of the table tennis club in my hometown, where I have been active since my early youth.

I would be delighted to support the Quality Assurance team in bringing the vision of "Always On" to reality. This internship could bring me one step closer to my goal of shaping the driver experience of the future. I am available to commence my internship from XX.XX.XXXX for a duration of 4 to 6 months and look forward to the opportunity of a personal interview.

Best regards from Karlsruhe
